# Ohio Imports 2015

## Executive Summary

Ohio merchandise imports were valued at nearly \$69 billion in 2015, a decrease of 2.0 percent from 2014. By comparison, the United States experienced a 4.5 percent decrease in imports since 2014.

### According to this report, in 2015:

- Ohio was the 11<sup>th</sup> largest importing state.
- 181 countries and territories were points of origination.
- 12 countries shipped over \$1 billion in merchandise to Ohio.
- 45 of the 98 commodity groups recorded imports exceeding \$100 million with 15 surpassing \$1 billion.

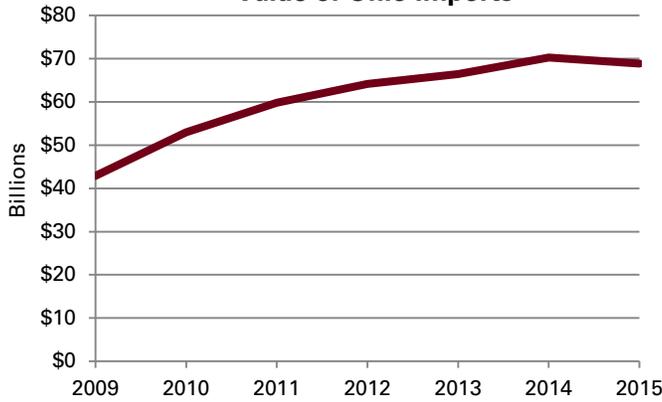

### Leading Origins:

- Imports from Canada totaled \$13.8 billion, 20 percent of the state figure. By comparison, U.S. imports from Canada were 13 percent of the national total.
- Asian countries accounted for 33 percent of Ohio's imports. The region's largest origins were China (\$13.4 billion) and Japan (\$5.2 billion). Total shipments from the region were up 1 percent compared to 2014.
- Shipments from Mexico totaled \$8.2 billion, Ohio's third largest origin, an increase of 5 percent from 2014.
- European countries shipped 23 percent of Ohio's imports. The three largest sources of imports were Germany (\$5.8 billion), France (\$1.9 billion), and Ireland (\$1.9 billion). Total shipments from the region were up 5 percent compared to 2014.
- Imports from Southeast Asia accounted for 8.1 percent (\$5.6 billion) of the state figure, an increase of 11 percent over the year. Shipments from South America and the Caribbean/Central America account for a 1.6 percent and a 1.1 percent share respectively.

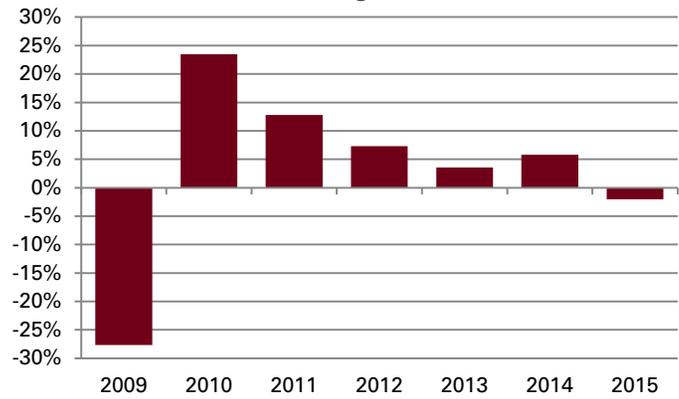

### Top Products:

- Machinery was Ohio's leading import (\$13.3 billion). Ohio accounted for 4.1 percent of industrial machinery imports for the U.S.
- The top six categories (machinery, electrical machinery, vehicles, pharmaceutical products, and both apparel categories) accounted for 53 percent (\$36.3 billion) of the state total.
- Six of the top 10 imports saw an increase from 2014. Pharmaceuticals and apparel saw the largest percentage increases at 27 percent and 13 percent respectively.

## **Guide to Import Data**

**Prepared by the U.S. Department of Commerce, International Trade Administration**

**State of Destination (SD) Series:** In the mid 1980s state data based on the import state of destination were added. However, in 1988, release of the data on import state of destination was discontinued due to quality concerns. Since then changes to the import reporting requirements along with growth of electronic reporting and a better understanding of the data's limitations has made it possible to bring back the import state of destination series.

Effective with January 2010 statistics, this new SD series will be available. A new supplement will be added to the FT900: U.S. International Trade in Goods and Services. In addition the following data products will be produced: Import state data by 6-digit Harmonized System (HS) and Import state data 4-digit North American Industry Classification System (NAICS). An example of the data structure for these files can be found on our website. Historical data tables and products will be made available for monthly data back to January 2008.

This new series is based upon the U.S. State of Destination Code. This is defined as the U.S. state, U.S. territory or U.S. possession where the merchandise is destined, as known at the time of entry summary filing. If the contents of the shipment are destined to more than one state, territory, or possession, or if the entry summary represents a consolidated shipment, report the state of destination with the greatest aggregate value. If in either case, this information is unknown, the state of the ultimate consignee, or the state where the entry is filed, in that order, should be reported. However, before either of these alternatives is used, a good faith effort should be made by the entry filer to ascertain the state where the imported merchandise will be delivered. In all cases, the state code reported should be derived from the standard postal two-letter state or territory abbreviation. For shipments into FTZ's, the import state represents the location of the zone.

In certain cases, the state of destination may not reflect the final location for which the imported goods are destined. Rather for these shipments, the state of destination, as known at the time the entry documentation is filed, may reflect an intermediary, storage or distribution point. From there, these shipments may later be distributed to another location in another state as the ultimate destination. For example, a consolidated shipment of many automobiles may be shipped by the importing company to a distribution point in one state with the intent of later shipping the automobiles to numerous states for final sale.

For additional information on the State of Destination series, visit the Census Bureau's website at <http://www.census.gov/foreign-trade/aip/elom.html> .
